Software for connected sensors designed for Data Center : *RentalEkko_Soft*
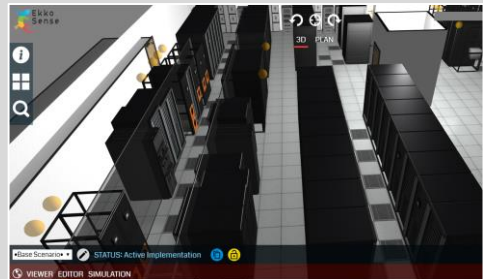

Introduction

The software ***RentalEkko_Soft is*** is a Saas accessible solution available through all Internet browser that displays live datas from the wireless sensors intalled in the Data Center rooms : temperature & humidity.

New tools for decision making when commissioning data rooms, all collected datas are then available on csv table.

Technical description

Device type	Values
Sensors	• **Temperature (°C)** • **Humidity**
Compliance	**Rackable connected 7kW load bank** **Rackable connected 6kW load bank** **21kWload bank**
Configuration	**Software As A Service (SaaS)** **Web browser (Chrome, Mozilla)**
Visualization	**2D room** **3D room**
Datas	**Export to csv file** **Printed report**
Precision	**Set up minute by minute**
EkkoSoft Sensors	**Max 300 units per hub**
Communication	**radio communication between the sensors and the external 3G panel**

Software for connected sensors designed for Data Center :
RentalEkko_Soft

Setting up

CLOUD

GSM

Radio

230V – 16A

User interface

Data Room
